to set standards of artistic and horticultural excellence;
to broaden knowledge of horticulture, floral design, conservation,
photography and other related areas; and to share the beauty of a
show with fellow club members and with the public.

The Garden Club of America Flower Show and Judging Guide,
July 2018 Edition

THE PURPOSE OF THE GARDEN CLUB OF AMERICA
is to stimulate the knowledge and love of gardening;
to share the advantage of association by means of
educational meetings, conferences, correspondence and
publications; and to restore, improve and protect the quality
of the environment through educational programs and action in
the fields of conservation and civic improvement.

THE MISSION OF THE PORTLAND GARDEN CLUB
is to stimulate the knowledge and love of gardening; to aid in the
protection of native trees, plants and birds; to encourage civic beauty;
and to improve and protect the quality of the environment through
programs and action in the fields of conservation and education.
Floratopia celebrates the vibrant connection between people, plants and place. Flora embodies all plant life, never ceasing to astound us with its beauty, color, texture and movement. The power of Flora to inspire spans generations in art, science, literature, medicine and architecture.

Flora lives in communities like we do, creating a dramatic mosaic of color and texture across an extraordinary range of conditions. This dynamic network connects us all.

Join us in reveling in the vibrancy, color and joy of Flora and the life-sustaining bond we share.

3. The Garden Club of America expects all exhibitors to be aware of the need to promote conservation of endangered and threatened plants. Plants collected in the wild and listed by the Oregon’s Natural Heritage Program may not be exhibited in any flower show sponsored by a GCA club. Cultivated plant material listed by Oregon’s Natural Heritage Program may be exhibited if accompanied by a typed card stating that it has not been collected from the wild or that it was collected out-of-state and giving information concerning its cultural requirements and methods of propagation. Natural Heritage Program lists of endangered plant material will be available before and during the show from the Division Chairs and are available online at http://plants.usda.gov/threat.html.

4. Plant material showing evidence of insects or disease must be removed immediately from the exhibition area. This rule will be enforced at any time during the show, whenever the problem is identified.

5. All entries in the Floral Design and Horticulture Divisions must include fresh and/or dried plant material. Fresh plant material must be in water or conditioned in such a way as to remain in pristine form while on exhibition. An entry not maintained in show condition may have its award removed. Entries in Photography are not required to include plant material unless otherwise stated in the schedule. Entries in Botanical Arts Division must use dried plant material.

6. Locally invasive plants, diseased plant material, artificial plant material, live animals (including fish), taxidermy, natural birds’ nests, feathers of any kind, and protected sea life, including coral are not permitted. The use of natural sea shells is strongly discouraged. http://plants.usda.gov/java/noxiousDriver
GENERAL INFORMATION

1. Entries are open to all GCA club members, including provisional, and professionals in their disciplines, and by invitation.

2. Advance registration is required for all classes, with the exception of Horticulture Division Classes 1-9. Registration is online at www.theportlandgardenclub.org. Classes will be filled in the order registration forms are electronically received. Confirmation of registration will be sent to exhibitors by email. Direct Floral Design, Horticulture or Botanical Arts registration questions to Janelle Jimerson janellejimerson@icloud.com. Direct Photography registration questions to Sharon Dowsett, s.dowsett@frontier.com.

3. Entering in a show constitutes permission to use images of the submitted content in all GCA channels of communication.

4. While The Garden Club of America, The Portland Garden Club, and The World Forestry Center will exercise due caution in safeguarding exhibits, responsibility for damage, loss or personal injury cannot be assumed.

5. Any clarification or change in the rules, as originally stated in the schedule, shall be communicated promptly in writing by the Division Chairs to all exhibitors in the class and, at the show, to the judges and to the passing committees.

6. A draft entry card must accompany each entry. See the Floral Design, Horticulture, Photography and Botanical Arts Guidelines for requirements specific to that division.

7. The Passing Committee must pass each entry before an exhibitor may leave the show area. The Passing Committee reserves the right to refuse any entry that does not conform to the rules of the schedule. The exhibitor has the option of correcting the entry, if time permits. If not corrected, the entry cannot be judged, but may remain in place, marked “For Exhibit Only” with a brief, constructively worded statement explaining why it was not judged. The judges may not disqualify any entry passed by the passing committee, unless evidence of insect infestation or disease is identified.
8. Once an entry is passed, the exhibitor(s) must immediately leave the show floor. The only exception will be Flower Show Committee members who have entered and been passed according to the timetable. A passed entry may not be touched again by exhibitor until after judging and then only to carry out necessary maintenance.

9. Only participating judges and clerks will be allowed on the show floor during judging. Flower Show Chairs and Division Chairs should remain nearby but off the show floor until needed.

10. All containers and accessories must be inconspicuously labeled with the exhibitor’s name.

11. A novice is an individual exhibitor who has not won a first place ribbon or a GCA Special Award, in the division entered at a GCA Major Flower Show or a Sanctioned Non-GCA Major Flower Show. An exhibitor winning a first place ribbon in a GCA Flower Show is still considered a novice in a GCA Major Flower Show or a Sanctioned Non-GCA Major Flower Show or in another division of any flower show. In addition, an exhibitor who has won a first place ribbon or Special Award in a GCA Major Flower Show or Sanctioned Non-GCA Major Flower Show is no longer a novice in any level of GCA Flower Shows in the division won. Only individual novice exhibitors are eligible to receive the Sandra Baylor Novice Floral Design Award or the GCA Novice Award. A novice exhibitor will be identified on the entry card, following the initial judging.

12. A statement of intent, if required or permitted by the show schedule must be submitted at the time of passing and not be more than 25 words, typed or printed in waterproof ink on a 4” x 6” white, unlined card.

13. All exhibits must remain in place and in show condition until stated removal time.
1. Please carefully read and follow the GCA Rules, General Information and Timetable for Exhibitors.

2. Questions regarding class requirements may be directed to the class consultants and/or the Division Chairs.

FLORA • POWER TO INSPIRE: art, science, medicine, literature

Nature nurtures. More experiences with nature during childhood influence environmental career choices and a lifelong concern for the environment. In partnership with Jim Proctor, Director of Environmental Studies at Lewis and Clark College, his students and K-12 urban and rural schools across Oregon, we will exhibit data collected in mature forests through an immersive multisensory experience. Visitors will be inspired to replicate this model to encourage children to pursue work in the horticultural and botanical sciences and become lifelong environmental stewards.

BIOMIMICRY: INNOVATION INSPIRED BY NATURE
Speaker: Beth Rattner, Executive Director Biomimicry Institute

“Biomimicry is the conscious emulation of nature’s genius. The more the human world functions like the natural world, the more likely we are to endure on this planet that is ours, but not ours alone. Emulating life is a survival strategy for the human race.” ~Janine Benyus, Founder of the Biomimicry Institute.

The practice of biomimicry studies nature’s best ideas and adapts them for human use.

Beth Rattner, Executive Director of the Biomimicry Institute, will share the power of biomimicry and how applications from nature are providing inspiration for major companies worldwide (including Boeing, Nike, General Mills, Shell, General Electric, Colgate-Palmolive, Proctor & Gamble, Kraft) to solve human problems and provide innovations to revolutionize how we invent, compute, heal ourselves, harness energy, repair the environment and feed the world.
